Profil

I am Fidèle MIAKANDA SEFI. Computer & AI Engineering student, passionate about Astronomy and emerging technologies. Driven by initiative and leadership, I am committed to continuous learning and creating value.

Education

University of Lubumbashi , BSc. Bac 2 in Computer Engineering, Artificial Intelligence, and Innovation	Lubumbashi, RDC Mar 2024 – July 2027
Don Bosco College , High School Diploma in Sciences • National Exam: 83%, Valedictorian (ranked 1st)	Kinshasa, RDC 2023

Experience

VODACOM CONGO (RDC) , Tech Start Ambassador • Ambassador for the Digital Acceleration Program launched by Vodacom DRC via the VODAEDUC platform, in partnership with Amazon Web Services. • Guided and supported young participants in free online courses, helping them develop essential technological skills accessible without mobile data.	Kinshasa, RDC Feb 2025 – present 1 year 2 months
EQUITY BCDC , Front Office & Digital Products Intern • Promoted, activated, and demonstrated the bank's digital products, including mobile applications, USSD services, and cards. • Supported customers in using digital channels, resolved front-line issues, and collected feedback to improve service adoption.	Kinshasa, RDC Oct 2024 – Dec 2024 3 months

Leadership and Development

Equity Leaders Program — EQUITY BCDC (May 2024 – Present): Selective mentorship and leadership development program for top-performing youth (80%+ in national exam), offering coaching and incubation in banking careers.

Foundational Leadership Development Course (FLDC) — The Fort Institute (Feb 2026 – Present): Selective Pan-African leadership development program focused on training the next generation of African leaders.

Aspire Leaders Program — Aspire Institute, Harvard-affiliated (Oct – Dec 2025): Global leadership program focused on professional growth, impact, and community leadership.

Awards and Distinctions

iQuHACK BlueQubit Challenge — MIT iQuISE (Jan 31–Feb 1, 2026): Ranked 12th at iQuHACK (320+ participants) and 16th globally (578+ teams) in a quantum computing hackathon.

International Astronomical Search Collaboration — Pan-STARRS (Jan 12–Feb 6, 2026): Participated in asteroid detection through astronomical image analysis, including positional measurements and orbital calculations.

Galactic Problem Solver — NASA Space Apps Challenge (Oct 4–5, 2025): Designed innovative solutions using NASA open data in a global hackathon.

Vodacom Exetat Scholarship — VODACOM RDC (Jan 2024): Selected among the top 100 students nationwide based on national exam performance.

Certificates

Data Engineering — Force-N (In Progress): Training in building and managing data pipelines, including processing, transformation, and storage for analytics and AI.

Elements of AI — University of Helsinki (Mar 2026): Introduction to AI concepts, ethics, and real-world applications.

Mobile Development — Organisation Internationale de la Francophonie (Jan 2026): Hands-on training in building Android and iOS applications.

Agentforce Specialist — Salesforce (Dec 2025): Focus on AI agents for sales automation, workflows, and intelligent customer management.

Pix Certification — Pix (Dec 2025): Certification of core digital and professional computing skills.

AI for Business — Simphon Africa (Nov 2025): Application of AI to business performance and decision-making.

Prepare Your Career in Generative AI — Microsoft & LinkedIn (Nov 2025): Career pathways and skills in generative AI.

Enhance Productivity with Generative AI — Microsoft & LinkedIn (Nov 2025): Using generative AI tools to improve productivity.

Microsoft Excel — TOSA (Oct 2025): Advanced data analysis and spreadsheet management.

Introduction to Cybersecurity — Cisco (Sep 2025): Fundamentals of cybersecurity and system protection.

Oracle Cloud Infrastructure Generative AI Professional — Oracle (Aug 2025): Deployment and use of generative AI models in Oracle Cloud.

JA Digital Entrepreneurship Program — JA Worldwide (Jul 2025): Digital entrepreneurship and innovation training.

Learning AI Through Visualization — Columbia+ (Jun 2025): Understanding AI/ML through visual and interactive methods.

Skills

Concepts: Machine Learning, Deep Learning, Graph Neural Networks, Computer Vision, Generative AI, Natural Language Processing, Data Engineering, IoT & Embedded Systems, Mobile Development, Web Development

Frameworks: TensorFlow, PyTorch, Scikit-learn, Pandas, NumPy, OpenCV, Matplotlib, Flask, Streamlit

Programming: Python, JavaScript, HTML/CSS, SQL, Linux

Infrastructure: AWS, Oracle Cloud, IoT Device Integration, Networking Basics

Research: Problem Solving, Experimentation, LaTeX

Tools: Microsoft Excel, MIT App Inventor, Git/GitHub, VS Code, Jupyter Notebook, Google Colab, Astrometrica

Languages

Native proficiency: French, Lingala

Professional working proficiency: English
